EYEBROW MICROBLADING

AGREEMENT FOR PERMANENT COSMETICS

This form is designed to give information needed to make an informed choice of whether or not to undergo a permanent cosmetics application. If you have questions, please don't hesitate to ask.

Although permanent cosmetic tattooing is effective in most cases, no guarantee can be made that a specific client will benefit from the procedure. This is the process of inserting pigment into the dermal layer of the skin and is a form of tattooing. All instruments that enter the skin or come in contact with body fluids are in a sealed/sterilized package before use and disposed of after use. Cross contamination guidelines are strictly adhered to.

Generally, the results are excellent. However, a perfect result is not a realistic expectation. It is usual to expect a touch-up after the healing is completed.

This procedure is done by hand, which indicates there is room for error and small discrepancies. This is normal for any microblading procedure. Initially the color will appear much more vibrant or darker compared to the end result. Usually within 60 days the color will fade 10-30%, soften and look more natural. The pigment is semi-permanent and will fade over time. Touch-ups are needed to maintain the shape and color.

Microblading results are not guaranteed and if you are not happy with the results no litigation or social media slander can be taken against Arches Eyebrow Microblading or any of its employees.
